

## EU-HYBNET, #CERIS workshop 14th of June 2021

On the 14th of June 2021, EU-HYBNET has been invited by DG HOME to take part to the Disaster Risk Societies – State-of-play and way forward. As a follow-up of fruitful meetings in the Disaster-Resilient Societies (DRS) Thematic Area held from February to May 2021 within the “Community of European Research and Innovation for Security (CERIS)”, DG HOME provided a snapshot of main research-related recommendations and perspectives collected from discussions in the areas of societal resilience, technologies for first responders, support to Sendai FWA, climate extreme events, multihazard risk management (critical infrastructures) and pandemics. In this respect, panel discussions took place around the different themes with key DRS actors, and information was provided on Horizon Europe DRS topics for 2021-2022.

As highlighted in the slide below, Dr. Päivi Mattila, EU-HYBNET coordinator gave a presentation of EU-HYBNET describing the mains outputs and perspective for 2022. For further information concerning our project, please contact: Elodie Reuge ([elodie.reuge@eos-eu.com](mailto:elodie.reuge@eos-eu.com)) or Maguelone Laval ([Maguelone.laval@eos-eu.com](mailto:Maguelone.laval@eos-eu.com)) .

### Main outputs and perspectives for 2022

#### Outputs

- Focus on hybrid threats, vulnerabilities according to EC Conceptual Model (see pic.)
- Main findings – innovations to identified vulnerabilities:

#### Crises management& Critical infra protection

- ✓ Resilient democracy infra platform
- ✓ Early/rapid damage assessment system
- ✓ Smart message system for sharing interagency OP
- ✓ Establish Data embassies or E-embassies
- ✓ European Smart and sustainable City Award

#### Information – disinformation, fake news

- ✓ Tools monitorian populations response to information
- ✓ Fake news exposé; Automated fact-checkers; Guides to identify fakes

#### Perspectives

- OCT 2021-> new set of pan-European gaps&needs, vulnerabilities to counter hybrid threats will be identified, innovation mapping follows.
- Identified DRS fields for cooperation and interest e.g. mis-/disinformation, CBRN-E, citizen involvement, critical infra protection ...

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 883054
